## NEW CLASS THIS FALL

# Professional Electricians Code Training Walk through the Code in One Year!

At the Centex IEC, you can get the education and training you need to become a **professional electrician!** This Professional Electricians Career Training Course is a refreshed Centex IEC offering. It is an ideal choice for those who have an abundant amount of electrical experience, but lack the formal in-class training.

This fast paced, technical training program, aims to provide an alternative path, for those with **four (4) or more years of field electrical experience**, to gain the classroom knowledge generally offered in the first two years of a typical electrical apprenticeship program. This program is NOT designed to replace Registered Apprenticeship Training, but to improve an electrician's skills to keep them competitive and productive in today's market.

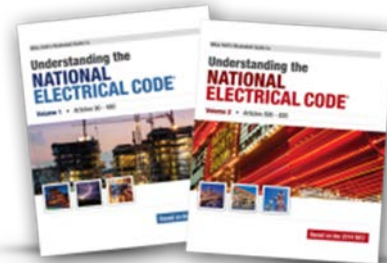

Each of the 6-week MODULE style courses cover a wide range of relative topics accompanied by **Mike Holt's industry leading textbooks** and taught by an industry subject matter expert.

|          |                       |                         |
|----------|-----------------------|-------------------------|
| MODULE 1 | NEC® Articles 090-110 | Basic Electrical Theory |
| MODULE 2 | NEC® Articles 200-285 | Code Calculations       |
| MODULE 3 | NEC® Articles 300-393 | OSHA 10-Hour Safety     |
| MODULE 4 | NEC® Articles 400-450 | Frist Aid/ CPR/ AED     |
| MODULE 5 | NEC® Chapters 5, 6, 7 |                         |

**Modules must be taken in consecutive order.**

### Book Package Includes:

- 2014 NEC® and Tabs
- MH Understanding the NEC, Vol. 1 & 2
- MH Basic Electrical Theory
- American Red Cross Student Manual
- IEC Safety Material and Handbook

NOTE: By enrolling in this course, the electrician (student) understands that this is a financial obligation to the IEC and agrees to pay for all 5 modules, prior to first day of class of each module.
